

INSIDE MICROMETERS

CEJ Inside Micrometers are extremely useful for measuring diameter of bores and other inside lengths. End pieces and measuring tips are spherical carbide. Reading to 0,01mm. Measuring range is 25 mm. Extensions are supplied with plastic insulation to minimize temperature change when handling [excluding 25 and 50 mm]. Metal surfaces are chromated.

CEJ Inside Micrometers are available as sets or in fixed lengths. The sets consists of a Micrometer head with an end piece of fully interchangeable extensions. Individual extensions can be added to increase the capacity beyond the maximum range of the standard sets. Inside Micrometer sets are delivered in a case with holder.

Customdesigned Inside Micrometers will be quoted on request.
